VOLUME IV NO. 23 — CHICAGO FEBRUARY 25, 1919 — 5,000 CIRCULATION GUARANTEED

Miss Adelaide Sahs of 7836 Peoria St. entertained a number of her friends at a Washington bunco party, Sunday night, February 23. The house was decorated for the occasion, and a very elaborate luncheon was served. After playing bunco, for which beautiful prizes were given, all enjoyed themselves dancing and singing. Those present were: Arnold Sahs, Harold Savage, Cecil Sahs, Marshall Johnson, Howard Sahs, Peter Schweihs, Elmer Schusler, Margaret Loftis, Helen Harmening, Vera Anderson, Gladys Brueggeman, Ella Buelow, and Adelaide Sahs.

Take your cleaning, pressing or repairing to Gus Bovik's Tailor Shop, 7822 Halsted St. for best results.

Miss Dorgan has gone to Washington to live during the coming year.

Cash Paid for Bonds. 7846 Halsted St.

Mrs. S. Anderson, 8745 Wallace St., has recovered from an attack of lumbago.

For Sale—White enameled bed, phone stand, gas heater, rocker. Stewart 3752.

### HOME STORE SERVICE

The relation that grows up between the stores in a place like Auburn Park and the people, is a very intimate one. The merchants and their clerks are able to make a study of the individual needs, tastes, and desires of their patrons.

When you visit a big department store in some other place, the salespeople never saw you before and never expect to recognize you again. They have little idea what you want, and they are less likely to be able to please you.

Your home store merchant or clerk sold you a similar article last year and probably for several years. He at once knows the kind of thing you are looking for, and he helps you to select it.

The results of making this kind of purchase is always economical. People will use a thing much longer if it meets their desires and tastes. The things that cost high are the misfits that they get in stores where their individual desire is not intelligently assisted.

### One Word Spoils All.

Just when a woman begins to be invited out a little by nice people her husband spoils it all by referring to the laundress as the washerwoman right out where everybody can hear.—Ohio State Journal.

### Origin of "Torpedo."

The word torpedo is said by the authorities to owe its designation to the Latin verb "torpere," to be stiff, owing to its inauspicious appearance; probably also from its resemblance to the species of fish known by the same name.

### Skilled in Fine Work.

One of the trades calling for the greatest skill is the making of compasses. This work had never been undertaken by women until dilution of labor became necessary. Of the infinite number of delicate parts demanding absolute accuracy, women have succeeded in making all but two or three and even these will shortly be to their credit.

### That's How It's Done.

A black mammy's recipes for her cakes: "Why, sure, honey, I'll tell you jess how to do it. You takes as much meal as you wants, mix in some flour an' three or four eigs, put in milk 'nough to make it thick as it oughter be; don't forgit a pinch or two o' salt and a good-sized lump o' butter; drop in a little sugar, too; den fill de little pans an' put 'em in de oven . . . till dey's done, honey."

### Materials in Airplane.

Exclusive of the engine, the average airplane contains 4,326 nails, 3,377 screws, 920 steel clampings, 798 forgings, 276 turnbuckles, 65 pounds of aluminum and relative quantities of varnish, rubber, linen, wood, etc.

### Importation of Intestines.

Intestines are imported into the United States from China to the extent of nearly $400,000 worth a year. They are used by packing houses for sausage casings. The intestines are prepared for shipping at Shanghai, Hankow, or Tientsin by being scraped, cleaned and preserved with salt and salt water, and packed in oak barrels having a capacity of 2,500 to 3,000 bundles with about 80 per cent salt. Pig intestines are exported in a dried condition.

### Rugby Football.

At the famous school of Rugby, England, originated that form of football, now bearing the name of the school. An inscription, at Rugby reads: "This stone commemorates the exploit of William Webb Ellis, who, with a fine disregard for the rules of football, as played in his time, first took the ball in his arms and ran with it, thus originating the distinctive feature of the rugby game. A. D. 1823."

### Paper From Bark.

Over 50 kinds of bark are now used to manufacture paper, besides banana skins, bean stalks, pea vines, cocoanut fiber, clover and hay straw, fresh water weeds, seaweeds and over 150 kinds of grasses.

### One Step.

Life is not so complex, if we do not persist in making it so. We need faith; we need chronically to keep the corners of the mouth turned up, and not down. And after all, it is only a step at a time.—Ralph Waldo Trine.

### Told in a Few Words.

A Brunswick soldier, who was taken prisoner by Americans in the war, said: "Ah! America is a fine free country; it is worth people fighting for; I know the difference by knowing my own; in my country, if prince say, 'Eat straw,' we eat straw."—Thomas Paine.

### Environment Counts.

It is well to remember that environment has much to do with achievement. Associate only with those who are full of enthusiasm and determined to succeed. Keep close to people who encourage you. Create peace in the home. Make of it a harbor of refuge, a means of escape from a work-a-day world. If you will do this, you will soon find yourself well on the road to success.—Fern Howard.

### Happiness.

The man who cannot be happy with whatever little he may have could not be happy with whatever much he may want. Happiness is a condition within a man that is not dependent upon the things without.

### Names of South American Countries.

Mexico is a Spanish rendering, or combination, of Aztec words meaning the place of the war god. Brazil seems to have derived its name from the legendary island of Brazil (later identified with one of the Azores), because it was found to produce a red wood resembling brazil wood. Chile and Peru are of aboriginal origin. Argentina is an invented name based on the Latin word for silver, as Rio de la Plata, the name of its chief river, means silver river in Spanish.

### Great Mystery Solved.

Doctor Hirschberg says one of the most common causes of stammering is the temporary interruption of speech. You know it is one of the compensations of human existence to have the mystery of a lifetime solved in a jiffy. We ascertained some time back that hunger is frequently caused by a prolonged interruption of the movement of victuals to the stomach.—Houston Post.

### How Vines Draw on Soil.

Vines are said to extract yearly from the soil only about three-fourths of the quantity of potash and sulphuric acid that cereals take up.

### Daily Thought.

It is necessary that whoever is brave should be a man of great soul.—Cicero.

### World's Deepest Mine.

The deepest mine in the world is said to be the St. John del Rey copper mine in Brazil, which has a depth of 6,800 feet.

### Steam Engine Helped.

It is an historic fact that the development of the steam engine enabled England to stand the cost of the wars with Napoleon and speedily enjoy a more widespread prosperity than the country had ever before known.

### "Fireproof" Orientals.

Orientals seem to be immune to the fierce heat of the fireroom in ocean steamers, and can endure for a great length of time temperature that would speedily prostrate white men.

### Sable Philosopher.

De hymn tells you 'bout bein' "in Heaven a thousand years," but dar's some folks what couldn't stand sich long time prosperity.—Atlanta Constitution.

### Safety for Saws.

In order to prevent damage to circular saws and danger to workmen, it has been found advisable to give all logs which come to a sawmill a thorough spraying with jets of water. This removes bits of rock or gravel before the logs go to the saw.

### Quick Work.

Overheard at a county fair: (Intoxicated Man gazing in open-mouthed astonishment at an incubator just placed in floral hall and in which the chicks are beginning to hatch)—"These here incubators just beat anything I ever saw. I give you my word them eggs haven't been in here an hour and they are hatching already."

### Japanese Idea of Music.

Among the Japanese especially, a directly divine origin is attributed to music. The mythical legend runs that the art was invented by the gods to appease the anger of the sun goddess and to induce her to shine once more upon the earth and upon the other divinities. The melodies which resulted were potent to prevail upon her, and thus was light restored to the world and music and dancing were given for its delight.

### X-Ray Reflectors.

Mica has been found an excellent material for concentrating mirrors for X-rays. Glass will not do, because, smooth as it is, it is too rough for the extremely minute X-rays, which are much smaller than light waves. Glass diffuses the X-rays, much as a rough surface diffuses light waves, but it was found that the surface of mineral crystals were of the requisite smoothness for reflecting X-rays, and of them mica is the most adaptable, being readily split into sheets.

### Iceland's Fisheries.

Iceland has excellent fisheries, among the best in the world, and her fishing industry is growing rapidly.

### Mildew Stains.

To remove mildew stains, rub with lemon juice and salt. The same treatment will remove peach and all friut stains.

### Optimistic Thought.

Age is venerable in a man—and would be in a woman if she ever became old.

### And He Was Annoyed!

The Proprietor—"What made that customer walk out without buying anything? You didn't offend him, I suppose?" Shopman—"I don't think I did, sir. He asked me to show him a hat to suit his head and I showed him some of our soft felts."—Pearson's Weekly.

### Origin of Apple Dumplings.

A dumpling is a good old English dish and comes from the word dumpen, that meant to throw down suddenly and the diminutive ending ling. The idea was a little cake that was made by throwing raw rough dough into boiling water.

### Plantfood in Soil.

A chemical analysis cannot show the amount of available plantfood in a soil. A chemist could, without difficulty, make an artificial soil containing every element of plantfood in abundance, and yet be perfectly sterile. Peat, for example, is usually very rich in nitrogen, but it is locked up or unavailable. To pulverize it and mix it with lime is to change it into a highly nutritious soil.

### Look for the Large Chance.

The opportunity that is bigger than you are cannot help you, no matter how close it comes. To be worth anything, a chance must fit. Instead of simply waiting for your opportunity, grow up to it. Big people do not need to put up with small openings, and little people find it impossible to fill big ones. If you are growing all the time, and fitting yourself for the larger chances, you need not worry for fear they will fail to present themselves.

### White Buzzards.

A page from Captain Dampier's "First Voyage to the Bay of Campeachy" published in 1729, tells of white buzzards. A native of any of the southern states will vouch for the fact that a white buzzard in those parts would be regarded as something of an absurdity, but says the veracious old sea captain: "Some of the carrion crows are all over white but their feathers look as if they were sullied. . . . 'Tis seldom that we see a great number of black ones but that we see one white one among them."

### Daily Thought.

A man's first care should be to avoid the reproaches of his own heart.—Addison.

### Self-Denial.

You must practice self-denial if you would get well and keep well. There is no other way—no short cut or royal road to health. Do not permit yourself to be deluded on this subject.

### Plurality Didn't Elect.

In all of the three times that he ran for president Grover Cleveland polled a plurality of the popular vote. In his second race, when he was defeated, his plurality over Harrison was 98,017.

### Too True, Alas, Too True!

If you would be classed as a good fellow all you have to do is to applaud your fool friends.—Milwaukee Journal.

### Have No Silly Belief in Luck.

All successful men have agreed in one thing—they were causationists. They believed that things went not by luck, but by law. Belief in compensation—or, that nothing is got for nothing—characterizes all valuable minds.—Emerson.

### All Is Not Lost.

Boys no longer have the opportunity to learn their lessons by the light of a pine knot. But opportunities to master draw poker in a quiet hay loft, and by the light of a smudged lantern still are available in many rural communities.—Topeka Capital.

### Grandmother In Eighteen Days.

A lady green bug becomes a grandmother in 18 days. One can imagine, then, notes a naturalist, the multitudinous armies of these insects that may develop in the course of a season. Their worst foe is a tiny black four-winged fly that deposits an egg in each bug it comes across, its larva consuming the bug's inside works and using its shell for a house.

### Wanted Full Particulars.

Before little Bill and his mother reached auntie's home he was cautioned to be on his good behavior and to be nice to "mother's friends." But he was such a little boy to be good all the time, and a few hours after his arrival he apparently sized up the situation and asked, "Well, who else do I have to be nice to besides mother's friends, and Aunt Mary's friends, and Aunt Margaret's friends?"

### Welsh "Stafell."

Reference to a "stafell" in a recent West Wales branch of promise case puzzled the court. The "stafell" is the household linen usually brought by a Welsh bride to her new home. The custom, still practiced, is one of great antiquity. In early times a girl was not allowed to get married until she had spun the linen, and from it comes the term spinster. "Stafell" is now bought at the shop, to the old folks a degenerate innovation.

# GREAT MARCH SALE AT REISS & MEYERS

**7826-32 So. Halsted Street, near 79th Street**

THE STORE OF SUPERIOR QUALITIES AND MODERATE PRICES

### Strange but True.

You can't find any molasses that tastes like maple sirup, but you can find a lot of maple sirup that tastes like molasses.—Buffalo Enquirer.

### Power of Sympathy.

There is a wonderful power in sympathy to open and display the hidden richness of a man's own seemingly narow life.—Phillips Brooks.

### Wholesome Don't.

Don't lose your temper. It is of far more importance to keep good tempered and undisturbed even if things do go a little wrong than to set the nerves of the whole family on edge because of some omission.

### Aid to Remembrance.

Dorothy has a habit of biting her finger nails. Her father promised her a ruby ring on her birthday if she would stop the habit. At the end of the first day she inquired: "Daddy, if I had the ring on my finger don't you think me could 'member more better?"

### Aztec Emeralds.

Among the Aztec treasures of Mexico were found many fine emeralds. They were exquisitely cut, and it is from this source that the magnificent emeralds now forming part of the royal collection of Spain are supposed to have been taken.

### Forests of the Caucasus.

The forests of the Caucasus in Russia are estimated at 12,000,000 acres, chiefly in the Black sea territory, which is at the rate of nearly twenty acres to each inhabitant. The forests of western Siberia have been scarcely explored, but they are stated to be 200,000,000 acres in extent, more than half being in an absolute state of nature.—Rocky Mountain Herald.

### Heart Is Busy Organ.

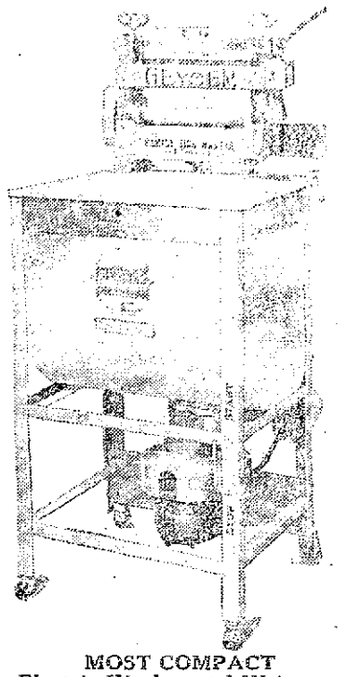
Your heart is a very busy organ. While you breathe once, it beats four times. At each beat it sends four pounds of blood through your veins and arteries. The weight of the circulating blood is 20 pounds. When you run, your legs and the other parts of your body need more blood, so your heart must pump faster. It is a ceaseless worker.

### Cubeb.

Cubeb berries are from the climbing plant called Piper Cubeba, native of the West Indies, being extensively cultivated in Java and Sumatra. It is used as local stimulant in indigestion and as a flavoring vehicle in mixtures and gargles. It is valuable particularly in diseases of the mucous membrane, especially of the bronchi. Frequently smoked in cigarettes for their effect onothe mucous membrane of the bronchi and larynx.

## The Housewife of the Hour Knows Great Cleaning Power

THE MOST EFFICIENT, MOST ECONOMICAL AND EASIEST WAY TO CLEAN



MOST COMPACT
Electric Washer and Wringer
Ever Built

**The Geyser**

THE RIGHT PRINCIPLE

EUREKA VACUUM CLEANER

**Thousands of women in every part of the civilized world know by actual test from daily experience the thoroughness, ease and economy of using the wonder Eureka in cleaning the whole house.**

The Eureka cleans so thoroughly that when the semi-annual house cleaning time comes 'round, the rugs, carpets, curtains, mattresses, pillows, etc., are just spick and span—all the work is done—you are free from worries, backaches and that long ten-day siege of ceaseless dusting and sweeping.

**A Powerful Circulation** of hot suds is **forced** through the clothes by means of a high-speed **propeller** in the bottom of the tank. The water is also drawn back through the clothes by **suction**. This **double** washing action assures quick, thorough washing. There is **no wear** on the clothes, as they always remain under hot water in a constantly revolving cylinder. The unique "Geyser" principle of washing enables the **entire** tank and cylinder space to be used, instead of one-third to one-half of it.

D. W. Griffith Presents His Latest Masterpiece

**"A Romance of Happy Valley"**

Lillian Gish, Robert Harron
George Fawcett
AND ALL STAR CAST

"A page from the book of life" is what the critics say of this picture, which is but another instance of the wizardry of Griffith. In it you have Lillian Gish as the little country girl from "Happy Valley," and Robert Harron as the small town boy with the hankering after the white lights and the Broadway chickens; and George Fawcett as the prosperous and bossy old father; and a host of characters which perhaps are quite familiar to you all, but which will surely win your love and sympathy before you have finished seeing the story. And the best of it all is that there really is such a place as Happy Valley. Where is it? Oh, that would be telling.

Friday, February 28th
Matinee 2:15 and 4:15—Adults 17c

—IN—
**"The Girl Dodger"**

Charles Ray doesn't look like a fellow who would dodge girls, does he? Especially pretty ones such as Doris Lloy, for instance. And yet in this story of college life he is the bashful youth to the life, a "crammer," who burns the midnight oil, but in the pursuit of his studies only. But despite all his devotion to his work he gets himself involved in a scrape that makes him sorry out of his ancient skull, and what happens thereafter must be seen to be appreciated. If and recall your college days you will be more than interested in scenes the pranks which are played on the campus and in the shadow of the ivied walls.

### Optimistic Thought.

If illness has its trials it also has its blessings.

### Magician's Real Object.

We do not learn tricks of magic in order to deceive other people but to entertain them. The magician's object is not to mislead but to amuse.

### Playing Safe.

Billy wrote a letter to Santa Claus and when he finished he asked his father for a check. "Cause," said the little fellow in way of explanation, "of course Santa Claus has to pay his helpers or maybe the'd go off and strike on Christmas eve."

### Commerce and Art United.

The period of Antwerp's great rise to commercial prosperity was also that of the city's chief artistic production. The names of Quentin Matsys and of Rubens are specially connected with the city for Rubens was essentially an Antwerp man, although he was not, like Teniers and elder, and Van Dyke, a native of the place.

### First Secretary of Navy.

The first secretary of the navy was Benjamin Stoddert of Maryland, appointed in 1798, at the time of Adams' administration; he also served through the administration of Jefferson.

### X-Rays in Tuberculosis.

In the finished positive photographic print, the lungs of a normal person show white—this representing the air contained in the cells of the lungs. If the lung is diseased—as in pneumonia—it will show dark, i. e., the cells being occluded with matter. Tuberculosis is diagnosed by the spotted, mottled appearance of the affected lungs.

### Frogs as Wasp Eaters.

The common green frog has been discovered to possess an insatiate greed for wasps. This extraordinary appetite does not seem to be in the least checked by an occasional sting. The protecting color of the frog, which sits motionless upon leaves, no doubt deludes the most wary of insects into a sense of security.—Nyack Evening Journal.

### Competitive Accomplishment.

"My daughter is taking fencing lessons, and you should see how she can feint." "That's nothing. You ought to see how mine can throw a fit."

### New Botanical Specimen.

Hazel (aged four), seeing a gentleman with a large chrysanthemum in his button hole passing by, exclaimed, "Oh, mamma, look what a large Christmas anthem that man's got."

### Try to Be Agreeable.

We should wisely cultivate the act of being agreeable, not only in the company of our business associates or those persons whom we meet socially but in our own homes as well. By thus deporting ourselves we shall find life more pleasant and people in general—the home folks in particular—more considerate. On the other hand, if we continue to think only of ourselves we shall find life a trying affair.—Exchange.

[illegible] a living, but [illegible] work in identify yourse[illegible] the fell[illegible] it's coming to.—Boston Transcript.

### When a Swimmer Fails.

Many a man who boasts of his ability as a swimmer will flounder around utterly helpless in the sea of a woman's tears.—Florida Times-Union.

### We've Met the Lady.

A modern novelist describes a lady with whose like some of us are not wholly unfamiliar. "One moment," he says, "you think you are great chums, and the next you wonder if you've ever been presented."—Boston Transcript.

### To Clean Marble.

To clean discolored marble, first of all wash with soap and water, then wipe dry and apply a paste made of powdered hathbrick and lemon juice. Rub it well into the discolored parts and rinse it off in clean cold water.

### Like as Not; Like as Not.

As children we used to think that the sardines came from Sardinia. Now Maine cans and sends out $10,000,000 worth a year, and claims there are no better ones on the market. We suppose the olive oil the fish are packed in comes from Mississippi or South Carolina.—Brooklyn Eagle.

### Refresh Your Principles.

When a man starts afresh, either with the newness of a new year or with the stimulus of altered circumstances or with the inspiration of a new work, what his start ought to do for him is to refresh the deepest principles by which he lives.—Phillips Brooks.

### How Wind Travels.

When you are discussing the wind you must know that a gentle wind travels about five miles per hour, a high wind about 30 to 45 miles per hours, and a great hurricane 80 to 100 miles per hour. The velocity of the earth on its own axis exceeds, it is believed, 1,000 miles an hour. The velocity of the earth around the Sun is calculated to be 66,000 miles per hour, and the velocity of the moon to be 2,273 miles per hour.

### Plants Affected by Sun.

Some remarkable variations in plant structure and color from exposure to the sun at different hours of the day have been brought to the notice of the Royal Microscopical Society of England by Col. R. E. Rawson. In flowers of the common nasturtium—tropaeolum majus—the low sun of the early morning developed yellow coloring matter, the middle sun of midday stimulated the violets, blues and purples. The color of the foliage and lobing of the leaves also changed.

# MEATS—COOKING

Having established the largest retail meat business in Auburn Park and with the knowledge that we have reduced meat costs in this section, we believe we can be of still further assistance to the community and advance our own prosperity by suggesting weekly a number of appetizing dishes that may be prepared from the cheaper cuts of meat. An improved demand for these cheaper cuts will enable us to reduce our costs on the better cuts, so that mutual benefits are derived.

## Try Any One of These for Dinner This Week

### LAMB RAGOUT

Two ounces suet, 3 lbs. lamb breast and shoulder, cut into two inch squares; heat the suet and put in the meat, preparing on top of the stove; fry a few minutes until suet is about rendered; add four tablespoons flour, about a quart of hot water; mix thoroughly; add onion or two, one or two slices carrots, and a bay leaf if desired; cover and cook slowly until meat is tender; serve with rich brown gravy prepared from the pan; salt and pepper as desired.

The meat and suet for this recipe will cost 53 cents and will be ample for 8 people.

### SPARE RIBS AND KRAUT

Three lbs. salt spareribs, 2 lbs. kraut; put ribs in cold water and boil until tender; boil kraut with ribs or fry, as desired; serve together.

The meat and kraut for this will cost 50 cents and will serve 7 persons.

**Clip Out and Save These Recipes Look for More Every Week**

### BAKED STUFFED HEARTS

Six calves' hearts, four cups bread crumbs, three tablespoons chopped parsley, three tablespoons margarine or butter; remove all membrane from inside hearts; wash throughly, wipe dry; melt margarine; add to bread crumbs with parsley and half cup of water; salt and pepper lightly; stuff hearts and tie bread crust across top to keep in the stuffing; baste with melted margarine in moderate oven one hour to hour and a half; gravy with pan dripping; good hot or cold.

The meat for the above will cost about 35 or 40 cents and will serve six or more persons.

## Saturday Specials for Sunday Roasts

Fresh Pork Ham Roasts ..... **23½c**

Pork Loins, whole or half ..... **26½c**
